# Bamba

PEANUT SNACK

# Clinical Update: LEAP Trial

- ☐ Results: increased prevalence of peanut allergy in avoidance group.
- ☐ Primary prevention: 86% relative reduction in peanut allergy
- ☐ Secondary prevention 70% relative reduction in peanut allergy
- ☐ Conclusion: early introduction of peanuts significantly decreased the frequency of the development of peanut allergy among children at high risk for this allergy and modulated immune responses to peanuts.

# Why allergy/ immunology?
